

Veterinary and phytosanitary services Belarus

According to item 18 of the Decree on the quarantine of plants in Belarus, the import of seeds, plants and phytogenous products (quarantine production) into Belarus from foreign countries is permitted under cover of the following documents: an import quarantine authorisation issued by the State inspection on the quarantine of plants quarantine or by its regional departments; and a phytosanitary certificate issued by the state authorities for quarantine and plant protection of the exporting country.

The abovementioned products are subject to a phytosanitary inspection at border crossing points when imported into Belarus. This inspection is free of charge for international transporters as it is the consignees who are invoiced for these services.

For further information, please contact the Belarussian directorate of state veterinary control: tel. (+375 17) 296 4085, 296 4285, 296 4093, 296 4301
